Education

MIT World Peace University

B.Tech. in Computer Science and Engineering

2020 – 2024

CGPA : 9.26/10

Satish Pradhan Dnyansadhana College

HSC

2018 – 2020

Grade : 80.77

Experience

Sleek

August 2024 – Present

Machine Learning Engineer

Singapore

- Built AI agents on Temporal that automate 85% of the targeted workflow at 99.5% precision, with durable and fault-tolerant execution.
- Developed MCP servers using AWS AgentCore and AWS Lambda, giving AI agents secure and scalable access to internal tools and systems.
- Created a centralized AI platform that gives teams across the company unified access to AWS Bedrock models, with built-in observability.
- Built a centralized platform for LLM evaluations and observability, enabling tracing, monitoring and quality measurement across teams.

Koushiki Innovision

July 2023 – December 2023

AR/VR Intern

Pune, Maharashtra

- Developed an interactive AR game for Android in Unity for children, turning classroom concepts into engaging hands-on experiences.
- Designed and built multiple 2D and 3D educational games, covering gameplay logic, assets and UI.

Publications

Interoperability between Blockchain Networks to support decentralized applications

February 2024

International Journal of Advances in Soft Computing and Intelligent Systems (IJASCIS) 2024

Poster Paper

Projects

AgentWorks | TypeScript, Bun, Hono, React, PostgreSQL, WebSockets

AgentWorks

- Built a multi-tenant dashboard for assigning tickets to autonomous AI agents, with a multi-provider LLM layer (OpenRouter, Anthropic, OpenAI, Claude Code CLI) and realtime updates over WebSockets.
- Engineered the agent runtime with cancellable runs, progress-based stall detection, interrupt and approval flows, and live tool-call visibility.
- Shipped a browser code view with branch diffs, plus chat with image attachments, voice input and #ticket/@agent mentions. Deployed via Docker Compose, Railway and GitHub Actions CI, with per-company data isolation and JWT auth.

Indian Sign Language Detection using Yolov5 | Yolov5, Image Processing, Machine Learning

ISL-Yolov5

- Developed and implemented YOLOv5 for real-time detection of Indian Sign Language, trained on a custom dataset.

Insulin Recommendation on the basis of Blood Sugar Levels | Machine Learning, GNB, Streamlit

InsulinPrompt

- Predicts a diabetic patient's insulin dosage from blood sugar level, using a model trained on a custom dataset.

Technical Skills

Programming Languages: Python, TypeScript/JavaScript, Java, C++, C, C#

AI & Agents: AWS AgentCore, AWS Bedrock, LangGraph, Langfuse, MCP, Temporal

Backend & Frontend: FastAPI, NodeJS, Express, React

Databases & Messaging: PostgreSQL, MongoDB, MariaDB, Kafka, NATS, Camunda

Cloud & DevOps: AWS (Lambda, Bedrock, AgentCore), Docker, Kubernetes, Git, Linux

Spoken Languages: English, Hindi, Marathi
